# About the summit:

The Mathematics Summit, an initiative by S Chand Publishing, is back with its third edition, promising another impactful event focused on mathematics education. This two-day virtual summit will be held on August 30-31, 2024, featuring a number of sessions on teaching mathematics. It will bring educators, mathematicians, and experts from various domains to discuss and explore innovative techniques for teaching and learning mathematics.

The summit is aligned with the **National Curriculum Framework (NCF) 2023** and will allow educators to learn about the latest trends in mathematics education.

Through engaging presentations, workshops, and interactive discussions, educators will gain valuable insights, practical methods, and innovative resources to create a stimulating and effective learning environment for their students.

## Who should attend the Mathematics Summit?

The Mathematics Summit empowers educators of students in grades 1 to 8. Educators who are passionate about teaching mathematics and who want to learn about the latest trends in the field. The summit is also a great opportunity for educators to network with other professionals and share ideas.

Mathematics can be summarised as the art and science of discovering patterns and explaining them. As such, Mathematics is both ubiquitous and universal. It is all around us, in nature, in technology, and in the motion of the earth, sun, moon, and stars above. There is Mathematics in everything that we do and see, from shopping and cooking, to throwing a ball and playing games, to solar eclipses and climate patterns.... ~ **National Curriculum Framework (NCF) 2023**
